

# screenshots on Chromebooks

There are two ways to take a screenshot on a Chromebook - full screen, and partial screen.

Full screen: Ctrl + window switcher key

This is the window switcher key

# SCREENSHOTS ON CHROMEBOOKS

Partial screenshot (choose the area you want): Ctrl + shift + window switcher key. The screen will gray out, and a little plus sign will appear - click and drag with the trackpad or mouse to select the area. Chrome will automatically save all your screenshots to your google drive and will pop up a message in the bottom right corner to either “view” or “copy to clipboard”
