

Setting up Chromebooks for XtraMath

1. Create a student bookmark by going to Xtramath.org → sign in → students click on the star to make a bookmark 

The screenshot shows the XtraMath login interface. At the top, there are three tabs: 'Students' (highlighted with a red circle), 'Parents or Teachers', and 'Classroom'. Below the tabs, the text reads 'Welcome back' and 'Enter your information to begin'. To the left is an illustration of a blue and green backpack. On the right, there are two 'Sign in with' buttons: 'Google' (highlighted with a green circle) and 'Clever'. Below these are three input fields: 'Email:' with the placeholder 'parent or teacher', 'First name:', and 'PIN:'. At the bottom right, there is a checkbox labeled 'Remember me on this device' with a shield icon, which is pointed to by a blue arrow.

2. Make sure you have checked the box next to “remember me on this device”, then click “sign in with Google”

3. The google screen should pop up with the student’s name - click on their name

4. Enter the TEACHER’S @granitesd.org email address

5. Enter the student name and PIN number exactly as it is printed on the paper from the teacher; click submit.

If the sign in with google does not work for any reason, use the same steps to sign in without the google button. The chromebook should still remember the student account the next time they come to the website.
