

Adding New Students to XtraMath:

1. Before signing a student in on their chromebook, you first need to add them to your roster by logging into your [teacher account](#) (teacher dashboard → add students)

- Select “new student” and follow the directions on screen. Make note of the PIN number because you will need this to set up the student on their chromebook. If you are setting up your whole class, you can print all the PIN numbers at the end.

2. On the student chromebook, go to Xtramath.org and click on sign in, then click on “students:

Welcome back
Enter your information to begin

Click on “sign in with google”

Email: this is YOUR teacher email that you created your account with.

First name: type it exactly as you entered on your class list

PIN: this is the 4-digit number from the dashboard

Email:

First name:

PIN:

Remember me on this device

[Forgot your PIN?](#)

If the sign in with google does not work for any reason, use the same steps to sign in without the google button. The chromebook should still remember the student account the next time they come to the website.
